Step By Step Instructions

1. Handle – join the two 12mm chenille sticks with a few twists. This is the middle of the handle. If the wire is a concern for young hands use a piece of felt approx 7cm wide and hot glue it around the join in the middle and it becomes a padded handle.
2. Bend your 6mm chenille sticks in half into a wide 'v' shape (will give you four sets of legs – four legs on each side).
3. Put your two pieces of felt on top of each other and round off the edges to make a rounded lower body.

4. Laying one of your felt pieces flat on the table use your hot glue gun and glue your handle piece at either end of the flat top end of your bag (glue down about 3cm of the ends of the chenille stick handle to do this).
5. Now evenly space and glue down two pairs bent chenille stick legs (bent end) to either side of the piece of felt laying on your table.
6. Hot glue the other piece of felt over the top, covering the glued parts of the legs and handles. Do this in small stages to avoid the glue drying too fast on you.

7. Once this part is done bend the spider legs to make knees and feet.
8. Glue on the eyes.
9. Using hot glue create your wiggly smile with orange chenille stick it can be a smile or a scowl... You create its mood.
